

## Sack holders

For 30, 60 and 125 litre bags

### Chassis

All-welded chromium-plated steel tubes. With a stop to prevent the lid from hitting the wall. The ring locking the bag has a friction brake that keeps it up when changing bag, eliminating the risk of pinching. The ring on which a bag is put, could also be adjusted upwards to help during cleaning and is equipped with four nibs to keep the bag firmly in place.

### Lids

In coated fabric or powder coated steel plate. Red is standard for coated fabric, white for steelplate lids. Other colors available. The coated fabric lid closes very quietly, no risk of pinching. The lid easily removed for exchange/cleaning, closes firmly.

071-2000

### Castors/wheels

50-100 mm, 2-4 pcs depending on model.

### Sack holder steel rings

Folds up, friction lock to eliminate risk of pinching.

### LAYNDRY BAG HOLDER

#### 070-3300

For 125 l bags. All-welded chromium-plated steel tubes with rubber ends. Changing the bag is carried out by pressing the springy bag holder bars together. The spring steel in the bottom of the stand keeps the bag stretched and firmly in place. 75 mm castors.

#### 071-6000

For 125 l bags. All-welded chromium-plated steel tubes. The spring-steel bag holder keeps the bag firmly in place. 75 mm castors.
