

Gynaecology examination table

Examination table for gynaecology examinations, with two or three motors.

Chassis and design

Very sturdy construction, yet compact design, with four lifting points. A low minimum height and a high maximum height provides for excellent and ergonomic work posture and helps the patient entering and exiting the chair. Including leg supports, central locking castors, stainless steel bowl and paper roll holder. All-welded chromium-plated steel tubes, powder coating as option.

Backrest

The backrest is adjusted manually as standard. Electric adjustment as option.

Seat angle / Trendelenburg

Electrically adjustable.

Seat pad

With a cut-out section. The pad itself may be removed easily for practical cleaning reasons.

Stainless steel bowl

Included, placed under the seat.

Pads

High comfort, foam plastic padding, artificial leather covering, many colours to choose from, to match the room decor. The pads are protected from bumps by the chromium-plated steel frame.

Leg supports

Available in two designs, one with a padded cover in the same colour as the chair and one in a so-called integral foam. Easily and fully adjustable, also along the rails. Easily removable to move a patient from a bed or wheel chair.

Patient handles

Optional. Excellent when patients help themselves up and down from the chair. Chromium-plated steel, easily removable.

Gyn table with standard leg holders, coated chassis, pull-out leg section, side supports and patient handles.

Integral ball-joint leg holder

Integral leg holder

Item

Item	Art no
Gynaecology exam table, std leg holders	015-2031
Gynaecology exam table, integral leg h.	016-2031
Gynaecology exam table, integral ball-joint leg h.	016-2031-2

Accessories
