

## Floor scale, KERN

Professional floor scale, EC type approval (CE). Best seller for hospitals and clinics. Approval for medical use according to 93/42/EEC. Including verification class III.

Robust design for daily professional care use. Models available for max 250 or 300 kg.

Display can be hanged on the wall.

Rechargeable battery pack is optional.

### Platform

Robust platform, non-slip and secure, with height adjustable rubber feet. Including a level indicator to level the balance precisely.

### HOLD function

When patients do not stand completely still, a stable weight is calculated using an average weight which is then "frozen". This means that you have sufficient time to attend to the patient first and then take the weight reading in peace

Rechargeable battery pack is optional.

### Mother and child function

The mother's weight will be taken and then the scale will be reset to zero at the push of a button. The mother and baby can be weighed together. The weight of the child will now be shown on the display. Particularly good for infants, as they can be cradled in the arms of their mother while being weighed.

### Technical info

Platform (250 kg): 365x370x60 mm  
 Platform (300 kg): 400x500x120 mm  
 Display size: ca 25 mm high  
 Cable length: ca 150 cm
