

User manual : Mural fixation system (Wall cabinet)

Reference : 1103.75

1st Step :

- Drill 4 holes on the wall with a drill bit of Ø8 according to the provided wall support.
- Sink the wall plugs (the provided wall plugs are made for thick wall (concrete wall, etc...), in any case of different wall, adapt the wall plugs for a strong fixation of the wall cabinet.)

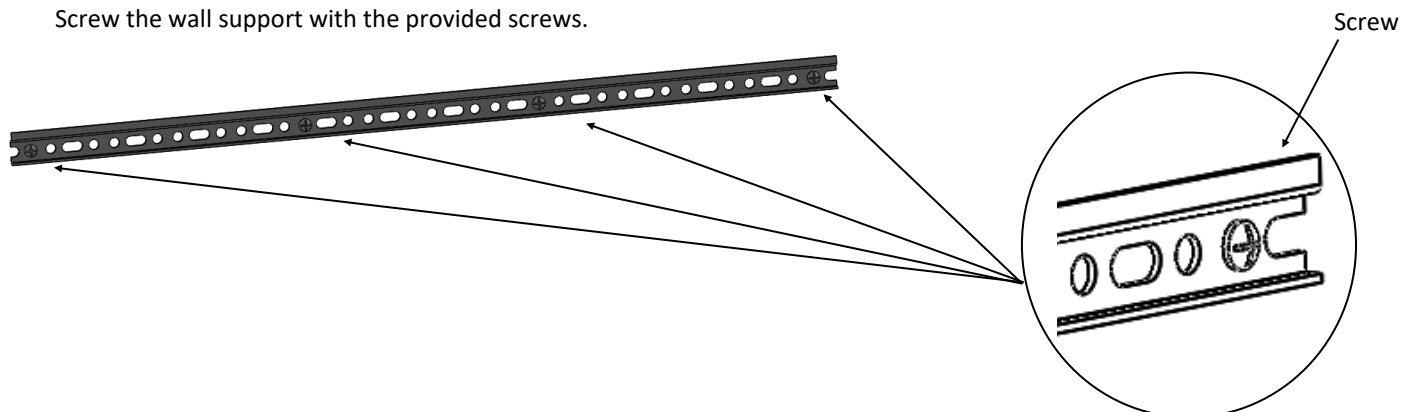

Caution !

Use **all** the provided wall plugs.

Do not use less than the 4 provided fixations.

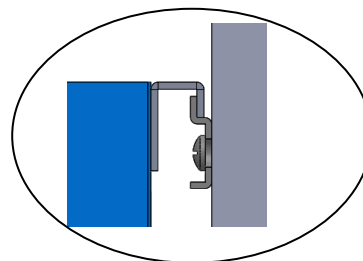

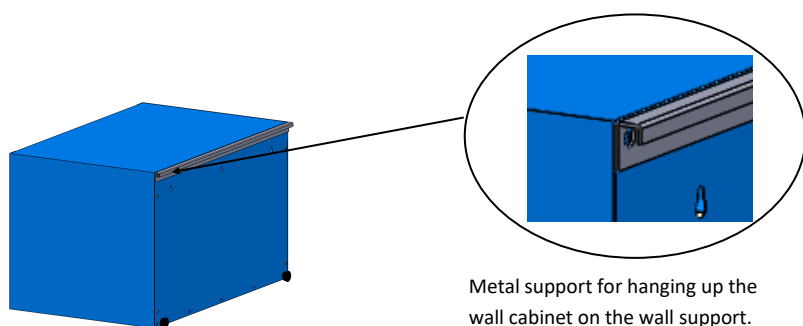

2nd Step :

- Screw the wall support with the provided screws.

3rd Step :

- Screw the metal support and rubber pads on the wall cabinet.
- Hang the wall cabinet up to the wall with the metal support and use the rubber pads to adjust.

Required tools :

- 1x Drill
- 1x Drill bit of Ø8
- 1x Cross-head screwdriver
