

Blood sample chair with 4 motors

For 175 or 215 kg

Electrically adjustable blood sample chair with Trendelenburg. Robust, with central locking castors for easy transports. Can be adjusted from standard position to Trendelenburg with just one press of a button.

Chassis

All-welded powder coated steel chassis. Very sturdy design and construction. A low lowest and high highest position helps staff get a correct work posture and patients to get on and off.

Backrest, legplate, seat tilt and height are all electrically adjustable.

Armrests

Very sturdy easily adjustable in height, angle, swivel and along the rail. Removable fully to help when moving patient from bed or wheelchair.

Available in three different designs all gas spring adjusted:

- * With removable pads (standard)
- * In black integral foam
- * Active armrests (attached to the backrest of the chair). The active armrests maintain its angle when the backrest is adjusted.

Patient handles

Very sturdy. Helps while patient gets on and off the chair. Removable, moves along the rail.

Pads

Foam plastic fill, artificial leather cover. Several available colours.

Castors

100 mm central locking castors.

Neck cushion

Included, removable and comfortable.

Motors

220-240 V / 24 V. Hand- and foot controls included. The foot control are placed onto the chair so that the floor is freed. Battery backup as option.
