

Aluminium transfer cabinets

DIN format

- One-piece robust structure in anodised aluminium alloy sheet without joints - Chassis in anti-torsion steel tubes for better rigidity - Lower bumper surrounding the chassis in anti-marking synthetic material.
- Frame of the cabinet and junction of the doors fitted with a hermetic joint to ensure a perfect seal.
- Doors open 270° with locking magnets in the open position - Continuous hinges over the entire height of the cabinet.
- Horizontal handles on the side with the swivel wheels.
- 4 Ø 200 mm wheels (2 fixed and 2 swivel) in grey rubber, non marking, with stainless steel roller bearings.
